

Yingting (Christine) Li

Berkeley, CA 94704 | (530) 551-3068 | ytingli@berkeley.edu
Portfolio: [christinel012.github.io](https://github.com/christinel012) | LinkedIn: [linkedin.com/in/christineli012](https://www.linkedin.com/in/christineli012)

EDUCATION

University of California, Berkeley
Master of Analytics

Berkeley, CA
Expected August 2027

University of California, Davis
Bachelor of Science in Statistics; Minor: Mathematics

Davis, CA
September 2022 – June 2026

- **GPA:** 3.95 / 4.0
- **Honors:** Phi Beta Kappa; Outstanding Performance Citation in Statistics; Dean's Honor List (5 quarters)
- **Relevant Coursework:** Multivariable & Vector Calculus, Applied Linear Algebra, Probability, Regression Analysis, Variance Analysis, Statistical Data Science
- **Technical Skills:** Python, R, SQL, MATLAB, LaTeX, Microsoft Office Suite
- **Certification:** Fundamentals of Deep Learning, NVIDIA

PROJECTS & SKILLS

Shoot Here - Photography Hotspot Recommender | Python, SQL/SQLite, scikit-learn, Streamlit

[Live App](#) | [Source Code](#) July 2026

- Built an end-to-end recommendation engine over 264K geotagged photos, engineering a pipeline (Flickr API → DBSCAN clustering → Google Places enrichment) that ranks 483 locations, fully cached for reproducibility
- Iterated a composite "photogenicity" scoring model 3x based on evidence (e.g., fixing single-user cluster gaming), deployed as a live multi-page app with parameterized ranking queries

Airbnb Neighborhood Impact | Python, LightGBM, SHAP, GeoPandas, Plotly, Streamlit April 2026

[Live Dashboard](#) | [Source Code](#)

- Engineered an automated pipeline ingesting 112,892 Airbnb listings across 5 US cities with dynamic date detection, eliminating manual URL updates
- Trained a LightGBM model ($R^2=0.708$) to predict neighborhood activity scores; SHAP analysis identified occupancy and commercial host rate as top predictors, deployed as a 6-tab interactive dashboard
- Deployed a 6-tab interactive Streamlit dashboard with choropleth maps, interactive SHAP exploration, and dark-themed data storytelling

Airbnb Price Explorer: Visualizing Travel Affordability

October 2025 – December 2025

[Live Demo](#) | [Source Code](#)

- Co-developed an interactive analytics website using React (JavaScript)
- Built an LSTM-based sequential regression model to predict Airbnb prices using time-stamped seasonal snapshots, capturing nonlinear and temporal pricing patterns
- Designed and implemented interactive Leaflet maps for five cities to visualize spatial price clustering and neighborhood-level affordability

PROFESSIONAL EXPERIENCE

Suzhou Hanerxi Medical Device Development Co., Ltd
Operations Data Analyst

Suzhou, China
June 2026 – August 2026

- Mined 3 months of MES equipment logs using statistical analysis to identify correlations between process parameters and product defects, discovering that spindle speeds of 2000–2200 RPM combined

with humidity >65% raised dimensional deviation probability by 40%; findings drove parameter lockdowns that improved first-pass yield

- Built a statistical defect-correlation model using SPC and Pareto analysis on IQC/IPQC/FQC datasets, quantifying the relationship between CTQ defect rates and process parameters to isolate root causes across man/machine/material/method/environment dimensions
- Built automated Power BI dashboards consolidating MES, ERP, and quality data, replacing manual Excel reporting and enabling real-time monitoring of OEE, yield, changeover time, and inventory turnover
- Decomposed OEE/SMED data to quantify hidden capacity loss, isolating mold-preheating wait time as the top driver of excess changeover downtime and informing a process redesign

CrossCurrents Capital

Suzhou, China

Summer Analyst

July 2024 – August 2024

- Conducted due diligence on 10+ startups across new energy, aerospace, and semiconductor sectors, synthesizing background checks, management interviews, and field inspections into standardized evaluation frameworks
- Built a competitive intelligence analysis of global OLED manufacturers benchmarking market share and technology positioning, directly informing a final investment decision
- Applied a standardized company-evaluation framework to assess organizational efficiency and scalability across investment candidates

LEADERSHIP & CAMPUS INVOLVEMENT

University of California, Davis - Global Affairs

Davis, CA

Summer Start Student Learning Assistant

April 2025 – August 2025

- Facilitated cultural-transition workshops and discussions for 60+ incoming international students as part of a 10-person team over a 6-week program
- Designed feedback-driven workshops and field activities that measurably reduced student anxiety and improved transition outcomes

Finance & Investment Club

Davis, CA

Member

October 2024 – December 2025

- Practiced comparative analysis and discounted cash flow modeling to evaluate investment candidates, including Apple, Amgen, and Lockheed Martin
- Built quantitative business/investment analysis skills through weekly market research, mentorship workshops, and speaker sessions

University of California, Davis - Mathematics Department

Davis, CA

Learning Assistant for MAT17A, Calculus for Biology and Medicine

September 2024 – December 2024

- Facilitated weekly discussion sections and problem-solving sessions, improving student comprehension of applied calculus concepts
- Collaborated with faculty and TAs in weekly meetings to refine course materials and instructional clarity

Chinese Undergraduate Student Union

Davis, CA

Board of Business Development

October 2022 – October 2024

- Evaluated 6 potential partnerships, contributing to a 15% increase in financial support through sustained and newly secured collaborations
- Secured the organization's first non-Chinese firm partnership, expanding integration with the local business community

ADDITIONAL INFORMATION

Languages: Mandarin (Native), English (Fluent), Spanish (Elementary, DELE A1)

Hobbies: Traveling, Photography, Baking
